DAFFODIL

# BULBS

## For Fall and Winter Planting

**BEAUTY**—More people should know the pleasure of growing Dutch bulbs. The classic beauty of flowers and foliage, the richness of perfumes, and the gorgeous and lasting decorative effect of the cut flowers are irresistible when one has once learned these things for himself.

**TIMELINESS**—Aside from their other advantages, bulbs are especially valuable in that many of them produce their flowers in the very early spring, at a season when few other plants are in blossom, and when flowers are doubly valuable from their rarity.

Likewise the bulbs may be removed from the ground and placed in reserve to ripen, thus making room for other flowering plants.

**CULTURE**—Beginners have an impression that there are many difficulties to overcome in order to have bulbs produce their flowers to perfection, whereas, in reality, no other plants are so easy to manage, none more showy, and none succeed so well under all circumstances as the different classes of bulbs. The secrets of growing bulbs successfully are good drainage, rich, loose soil, and planting deeply. If you are in doubt about soil being too heavy, put a little sand under each bulb; or better still, throw out the heavy soil to a depth of about two feet, put in a layer of broken bricks or stones for drainage and refill with loamy soil. In Southern California and similar climates, the watering should be done in such a way as to keep the soil moist but not soggy nor flooded. Exceptions to this rule will be noted under individual cultural directions.

### Germain's Special Bulb Collections

These are made up of the same choice bulbs as offered in this catalogue, but as we offer them at greatly reduced prices, we cannot allow any alterations.

| 12 Ranunculus, mixed                  | 2 Amaryllis Formosissima |

### NOTICE—BULBS BY EXPRESS

We strongly urge all bulb or plant shipments be made by express, as a new law passed requires all such shipments sent by mail to be inspected. Horticultural inspection is made only at the county seat, thus necessitating a triple postage. This is why we advocate EXPRESSING BULBS OR PLANTS.

We decline to send perishable goods, bulbs, or plants, C.O.D., unless a remittance of fifty per cent accompanies the order to insure us against loss.

Orders from unknown correspondents must be accompanied with cash or satisfactory reference. All bulbs, etc., forwarded at purchaser's expense.

Please note time of arrival attached to each variety of bulbs. Nearly all Dutch importations are in stock by October 1st. However there are other varieties not ready before December or January, so that it is impossible for us to ship all varieties at the same time. Forward your orders as early as possible, before our stock becomes broken.

# BULBS BY MAIL

Bulbs can now be sent by Parcel Post. They are exempt from inspection due to a recent ruling. This facilitates our service enabling us to deliver almost immediately any order for bulbs placed with us. In sending your order, kindly observe closely the directions UNDER THIS INSERT as these must apply to mail as well as express shipments.

The following bulbs require extra postage as listed below:

Bulbs	Extra Postage
Agapanthus.....	.05 each
Amaryllis.....	.05 each
Caladium.....	.05 each
Calla Lily.....	.05 each
Canna.....	.02 each

Hyacinth.....	.15 per dz.
Iris Kaempferi.....	.10 each
Lillium.....	.20 per dz.
Madeira Vine.....	.15 per dz.

Bulbs	Extra Postage
Narcissus or Daffodil.....	.15 per dz.
Ornithogalum.....	.10 each
Splrea.....	.10 each
Tulip.....	.05 per dz.
Tuberose.....	.20 per dz.

## Agapanthus

**African Lily or Love Flower.** One of the most beautiful plants to be found for display in pots or tubs upon the lawn or in a border. Flowers are a beautiful porcelain blue. Grows very similar to the Amaryllis, and is sometimes called the Blue Amaryllis. Blue flowers are very scarce; also it is worthy of cultivation as a fine flower for cutting.

**Culture**—Same as Amaryllis. Planted in the fall of the year. It blooms in July and August.

### AGAPANTHUS UMBELLATUS

	Ea.	
<b>Blue African Lily</b> Small size.....	\$0.25	
Large size.....	.50	
<b>White African Lily</b> .....	.25	

## Amaryllis

In shape like the Easter Lily. Some are of the most delicately beautiful shades, and others of the most gorgeous, ranging in color from pure white to the deepest of reds. They are prized alike in pots and in the sunny beds of a garden. The Amaryllis cannot be recommended too highly to the lover of flowers.

**Culture**—The bulbs require a seven or eight-inch pot, according to their size, and should be potted so that the neck of the bulb is above the surface of the ground. Be sure that the pot has good drainage. Use a good rich compost, water thoroughly after potting and place in a cool, sheltered place for two or three weeks. As soon as growth begins, remove to a sunny place, keeping them moderately moist at all times.

**For open ground**—Plant the bulbs in any good garden soil which has plenty of well rotted manure. Select the bed in a fully exposed sunny position. Plant so that the top is even with the surface of the soil. Keep the bed moist at all times. Irrigate; don't sprinkle. Plant in the fall. They bloom in July and August.

AMARYLLIS BELLA DONNA

**Amaryllis Bella Donna**—"Bella Donna Lily," white, delicately shaded with pink or light purple, flowering before the leaves appear, very fragrant and fine for cut flowers, lasting fully a week when cut.

First size.....	Each	Doz.
Second size.....	\$0.25	\$2.50
<b>A. Formosissima</b> , "Jacobean Lily," velvety crimson, very striking and beautiful; may be grown in water like hyacinths. Postage 15 cts per dozen extra.....	.10	1.00
<b>A. Johnsonii</b> , striped white on red ground, extra fine:		
First size.....	.25	2.50
Second size.....	.15	1.50
<b>A. Vitatta</b> , mixed, most beautiful shades, extra choice.....	.35	3.50

## Anemone

One of the most showy and beautiful flowers; of neat and compact growth, with elegantly cut foliage and the most brilliantly colored blossoms. It requires but little attention. For best effect plant in masses. Anemones show a wide range of beautiful colors.

**Culture**—Anemones require a rich, loamy soil. Soak the roots in water for six hours previous to planting. This causes them to swell and enables one to distinguish the crown, which is readily discernible by the fibrous points at the top of the root, the bottom being quite smooth. A sunny place is best. Place a slight ridge around the bed so that the plants may be flooded with water.

Plant any time from October to May. They bloom from February to July.

### SINGLE ANEMONES

	Ea.	Doz.	100
<b>Appenina</b> , sky blue, very fine.....	\$0.05	\$0.50

## Begonia

The Tuberos Rooted Begonias are very worthy of cultivation. The foliage of the plant is a rich glossy green; the flowers are wax-like and of various colors. Most successfully grown in pots, making a splendid display for the conservatory or garden.

**Culture**—Plant in pots in rich sandy loam to the depth of two to three inches. Water lightly at first; when they show above the ground, water moderately. Plant bulbs from February to May. They bloom from July to October.

	Ea.	Doz.
<b>Tuberos Rooted</b> , single varieties in separate colors. Copper color, dark red, orange, pink, salmon, scarlet, white and yellow.....	\$0.15	\$1.50

## Brodiaea

**Brodiaea Coccinea**, "Floral Fire Cracker," umbels of crimson pendant flowers, tipped bright green; 1 to 4 feet high.....

\$0.05 \$0.50

## Caladium

**Elephants Ear**, a tropical plant growing to a height of three or four feet, with corresponding breadth; the leaves are of immense size, often eighteen inches by two feet; as a single plant for lawn or large flower border, it has no superior and no lawn is complete without one of these beautiful plants.

**Culture**—Plant in the spring, covering the bulbs so that the crowns will be even with the surface of the ground. Give plenty of water after they start to grow, prior to which time they require very little moisture.

### Caladium Esculentum—

First size bulbs.....	\$0.20	\$2.00
Second size bulbs.....	.15	1.50

## Calla Lily

Known to every lover of flowers. It is one of the most beautiful blooms, and cannot be too highly recommended.

**Culture**—Callas are very easy to grow, but to be successful they need only be given a good rich soil and an abundance of water. May be planted either in a sunny or half shady place. The white variety may be planted from July to March, and will bloom all year excepting during June, July and August. The yellow variety is ready in December and should be planted shortly afterwards. The black variety may be planted from October to February, and will bloom in April and sometimes during the early part of May

YELLOW CALLA LILY

	Ea.	Doz.
<b>Lily of the Nile</b> , too well known in California to need further description.		
First size	\$0.10	\$1.00
Second size	.10	.75
Third size	.05	.50
<b>Spotted</b> ( <i>Richardia alba maculata</i> ) has spotted leaves, very ornamental; flowers white with purplish brown throat.	.15	1.50
<b>Arum Sanctum</b> (Black Calla) coal black, very striking.	.25	2.50
<b>Amorphophallus Rivieri</b> (Giant Black Calla) beautiful for groups. Ready about December 1st.	.25	2.50
<b>Pink Calla</b> ( <i>Rehmanni</i> ) grows about 18 inches high, habit similar to Little Gem Calla, ready about December 1st.	.25	2.50
<b>Yellow Calla, Elliotiana</b> . This is the finest Calla grown; large, deep, rich golden yellow color. The leaves are spotted with white, habit like our old favorite White Calla. Ready for shipment December 1st.		
Small size	.25	2.50
Large size	.35	3.50

## Calochortus

"The Mariposa Lily," or "Butterfly Tulip"

The Calochorti are among the most beautiful of our native California plants. The flowers resemble those of a tulip in form, and are of the most varied and showy colors. For eastern culture, as a pot plant, they will be found especially useful.

**Culture**—Have the bed slightly raised with drainage perfect. No fresh manure must be used; sandy loam is best. Plant as soon after October 1st as possible. Plant  $2\frac{1}{2}$  inches deep and 2 inches apart. During the winter and early spring the rains are sufficient, but if the late spring is dry, keep the ground barely moist after April 1st, and water liberally when the buds show for bloom.

	Ea.	Doz.
<b>Albus</b> (Fairy Bell, White Globe Tulip) flowers about an inch in diameter, pearly white with silky hairs, hanging like bells ten or twenty on a plant.	\$0.05	\$0.50
<b>Benthani</b> , flowers bright yellow; dainty cup lined with silky hairs.	.05	.50
<b>Clavatus</b> , flowers shaped like a broad-based bowl, sometimes 5 or 6 inches across; deep, rich yellow, the lower half covered thickly with stiff yellow hairs; tipped with round translucent knobs like tiny icicles. The largest flowered and stoutest stemmed of all the Mariposas.	.15	1.50
<b>Nitidus</b> , flowers large and white with an indigo blotch in the center of each petal. Covered inside with silky hairs.	.10	1.00
<b>Plummerae</b> ( <i>C. Weddi Purpurascens</i> ), rich lavender purple, lined with long, yellow, silky hairs, large, extra choice.	.05	.60
<b>Venustus Citrinus</b> , deep lemon yellow, with black eye; the plants grow from 1 to 3 feet high and produce flowers when well grown 3 to 4 inches across.	.05	.50
<b>Venustus El Dorado</b> , unsurpassed for beauty and variety of color, varying from white, pink, salmon, rich red, lilac to dark, velvety purple. All are marked with a showy yellow and brown eye, and beautifully lined and dotted.	.05	.50
<b>Venustus Oculatus</b> , white, cream, lilac or purple, habit similar to the above variety.	.05	.50
<b>Venustus Purpurascens</b> , purplish lilac outside and top of petals, creamy white half way, purple in center, beautiful eye at center of each petal. Flowers full 3 inches across.	.05	.50
<b>Venustus Roseus</b> , a creamy white or lilac with an eye midway and a rose colored blotch at apex.	.05	.50
<b>Vesta</b> , white suffused with lilac or rose purple, red center. Immense flowers measuring from 3 to 5 inches across. The best of all the Calochortus.	.10	1.00
<b>Mixed Calochortus</b> , contains many of the best varieties.	.05	.35

USE NUVIDA FERTILIZER FOR ALL VARIETIES OF PLANTS AND BULBS OR ON THE LAWN. NUVIDA MEANS "NEW LIFE" AND THIS FERTILIZER LIVES UP TO ITS NAME IN EVERY RESPECT.

## Canna

The most effective way to use the Canna is in large masses. A large group or bed of red Cannas, edged with Eulalia Japonica or Pennisetum is one of the most striking it is possible to create, and this display keeps up practically all the year around. Once planted, they may remain for several years and will improve, but if necessary, they transplant as easily as a Daffodil.

**Culture**—Easy to grow. Give the plants rich soil and plenty of moisture, setting them about eighteen inches apart each way.

Price, unless otherwise noted, strong dormant roots, each 15 cents; \$1.50 per dozen. Strong blooming plants, from 5 inch pots after May 1st, 25 cents each; \$2.50 per dozen.

**Al Menther.** Dazzling crimson scarlet, a good grower and very satisfactory in every way.

**Fire Bird.** Magnificent new red Canna with immense flowers eight inches across and the most showy variety in existence. It has been greatly admired by visitors to our nursery this year and it is the finest novelty in Cannas ever sent out. Price 50 cts.

**Furst Wied.** Pure crimson, of a clean even shade; below the average in dwarfness. The truss clear nicely, giving the plant a clean appearance at all times.

**Hungaria.** A beautiful blush pink, borne on large trusses. This is one of the best Cannas in cultivation, distinct from everything else. We have now growing at our nurseries an extremely fine lot and have reduced the price accordingly. Price 25 cts. each; \$2.50 per dozen.

**Carl Lutz.** Rich chrome yellow with paler throat. A distinct and charming Canna. Price 35 cts. each.

**Mont Blanc.** The only white Canna we grow and the best one we know. Price 50 cts.

**Mrs. A. F. Conard.** One of the finest pink varieties, with salmon shade and we can highly recommend it. Price 25 cts. each; \$2.50 per dozen.

**Olympic.** Something entirely distinct. Immense flowers of a rich rosy red with flaming center and carmine spots. An immense flower produced on large showy spikes. Reduced this year to 35 cts. each.

**Stuttgartia.** Golden yellow with lines and spots of crimson. Stands very erect and extremely showy. Everywhere a favorite.

**Wm. Boffinger.** If we were tied to one variety of red Canna, this would be our choice. In our nursery it flowers every month in the year and although so cheap there is not a better variety in existence. Price \$1.00 per dozen.

## Chlidanthus

A pretty, bright, lemon yellow flower; highly interesting; similar to the Amaryllis, and with a very sweet odor.

**Culture**—Plant any time in the fall to the depth of two to four inches deep in any good garden soil.

	Ea.	Doz.
<b>Chlidanthus fragrans</b> , .....	\$0.05	\$0.50

## Dielytra

"Bleeding Heart" is a good, reliable border plant, very attractive, but of little value for cutting purposes. Because of its unusually unique construction, it is unsurpassed as a garden adornment.

**Culture**—It flourishes in light or ordinary soil in shady situations, and should be always kept moist. Plant the bulb up to its neck. Planted in January or February they will bloom from the last of April until the middle of July.

<b>Dielytra Spectabilis</b> , "Bleeding Heart," a graceful plant with fern-like foliage and long sprays of pink and white heart-shaped flowers. Ready January .....	Ea.	Doz.
	\$0.25	\$2.50

## Crinum

Flowers are very large and of a beautiful shade of pink, richly scented, resembling the Amaryllis Bella Donna, except that it is of a lighter shade of pink.

**Culture**—Same as for the Amaryllis.

**Crinum Moorei, Ea**..... \$0.25

## Crocus

The Crocus is among our earliest spring flowering bulbs, and makes a splendid show when grown in masses. They may be planted any time in the fall, in good garden soil, about 3 inches deep and 3 or 4 inches apart; they may also be grown in pots or glasses sometimes grown in ornamental pots shaped like a hedgehog, when the bulbs are inserted in small holes about 1 inch apart. When in bloom, they are very effective for house decoration.

	Dz.	100
<b>Cloth of Gold</b> , yellow and brown	\$0.15	\$0.75
<b>Large Yellow</b> .....	.20	1.25
<b>Mixed Blue</b> .....	.15	.75
<b>Mixed Striped</b> .....	.15	.75
<b>Mixed White</b> .....	.15	.75
<b>Mixed All Colors</b> .....	.10	.60

## Dahlia

Dahlias are standard, tall growing tuberous plants. The beautiful flowers are of various colors, and the most prominent forms are known as the Cactus and Show or Fancy Varieties. The coloration of the Dahlia flower is of almost every imaginable combination, from the most intense rich colors to the most delicate and fascinating tints. They make good lasting cut flowers. The Cactus is one of the popular types and possesses the greatest range of shading.

**Culture**—Plant in any good sandy garden soil, covering the bulb up to the crown. Keep the soil moist but not soggy. Plant from February to May. They flower from July to October. They do best in an open, sunny place.

**Dahlia.** We have a very choice collection of named varieties of Cactus and other Dahlias, ready February to May. See our general catalogue for the various sorts.

## Freesia

This elegant little flower is so well known in California, and it seems so well adapted to our climate that no garden should be without them. They are one of the earliest flowering of the bulbs; are exceptionally fragrant; make a nice display in a pot for your window, or for borders in open sunny places, though they may also be grown in shady places. They blossom all through the spring, and the early blossoms often last two weeks if cut as soon as they are opened.

**Culture**—Freesias are very easily raised. Plant to the depth of three inches in any good, sandy soil, any time from August to November, and the flowers will appear during January and March.

FREESIA

**Freesia refracta alba.** Per dozen 10 cts; per 100 75 cts.. Mammoth size 15 cts. per dozen. \$1.00 per 100.

**Freesia Purity.** Mammoth size, pure white, 35 cts. dozen; \$2.50 per 100.

Medium size, 25 cts dozen; \$1.50 per 100.

## Gladiolus

The gladioli form a standard and reliable group of gorgeous summer-flowering bulbs.

**Culture**—The bulbs should be planted about five or six inches deep in any good light or sandy garden soil. They flourish best in an open sunny situation and may be planted from January to June.

<b>Peach Blossom.</b> A lovely shade of peach-blossom pink.....	.30	1.75

# Hyacinth

Prominent in the list of bulbs is the Hyacinth, which is most grown for early spring flowers in the garden, and for pot culture in the window garden. For certainty and regularity of bloom, Hyacinths are unsurpassed by any other flower. The simplicity of their culture and the invariable return for the little labor required to grow them make them general favorites. With little care they need never fail to produce a profusion of blossoms and their absence from the garden is a loss that cannot be supplied by any other flower.

**Culture**—Plant in open ground, in good rich soil, from October to January, covering to the depth of from four to six inches. For pot culture plant in five inch pots, leaving one-third of the bulb exposed. Keep in a cool dark place five or six weeks till the roots are fully developed, then gradually inure to the light.

In glasses, fill the glass with water so as to nearly touch the base of the bulb. A piece of charcoal the size of a walnut, put into the water, will keep it pure and obviate frequent changing. In changing the water, draw the roots lightly through the hand to clean them from any scum which might, if left, induce rot.

 Each, 25 cts; per dozen, \$2.50

# Iris

Irises, or fleur-de-lis, form an important group of brilliant colored flowers which almost equal orchids in beauty, richness and variety of color. They have thick clumps of long, narrow, equitant foliage. They are very ornamental and the showy flowers prove excellent for cutting purposes. The German Iris is the best known. It is fine for planting among rocks or will thrive well in damp, marshy places. s excellent for cut flowers.

The Spanish Irises have been in cultivation for many years, and the beautiful ornamental flowers vary in color from white to brown, yellow, violet, blue and purple, together with marvelous combinations that are well nigh indescribable. This iris is very easily grown in half-shaded situations, and the flowers are valuable for cutting. A great favorite with florists.

The Japanese Iris was cultivated by the Japanese for many centuries and the great, handsome blossoms are wide and flat. The predominating colors of the blossoms are white, with tints of violet and purple or again, they are pinkish or grayish, and show a bewildering combination of markings. The plant requires a moist soil. Bulbs ready for planting in February.

**Culture**—Plant in light, rich soil, about three inches deep. Often planted in clumps where they are particularly effective. For this purpose, set the bulbs about three inches apart each way; every three or four years they should be dug up and reset. Japanese varieties should be planted in February and will flower in May; the German may be planted from October to May, and will flower from April to August. The Spanish and other varieties should be planted in October and will bloom during March, April, and a part of May.

<b>Anglica</b> (English Iris), fine mixed, an old fashioned flower; large, handsome flowers, mostly of rich purple, blue or lilac shades, very hardy, grows 18 to 20 inches high.....	Ea.	Doz.
	\$0.05	\$0.35

# Lilium

We cannot say too much in praise of this elegant class of plants, which are becoming more popular every year. It does not seem necessary to attempt an improvement on that which is already perfect, as the lily is. Nature has endowed the lily with every element of grace and beauty, not only in outline but in color: the happy blending of colors in forms most varied and beautiful, in fragrance delightful; in short, in all the characters essential to real beauty.

**Culture**—In open ground; dig well, add some sand and well rotted manure (except for Auratum, which will not bear manure) and plant about five inches deep. In pots: Give thorough drainage, then fill up with compost, consisting of good, rich soil, peat and river sand; place the bulb firmly on this and cover about one inch below the surface; give no water until plants appear above ground, then water freely.

**L. Harrisii** ready Sept. 1st, other varieties about the middle of December. They bloom as follows:

**Harrisii** in April and May; **Candidum** in May; other varieties in July and August.

LILIUM AURATUM

**Auratum**, "Golden Banded Lily." Ea. Doz.  
 the finest and most magnificent of the genus. Flowers white, spotted crimson with a distinct golden stripe running through each petal. First size bulb..... \$0.25 \$2.50

**Tigrinum**, "Tiger Lily," orange, spotted black, very showy. Ready January..... .15 1.50

## A Few Words about our Poultry Supply Dept.

Our Poultry, Dog, Cat, Bird, Fish and Rabbit Departments are each in charge of experts whose knowledge is at your service, and they are ever ready to give information as to prices of all supplies or the uses of any of our many foods and medicines.

### POULTRY

In our Poultry Department are incubators that hatch, brooders that brood, appliances that save labor, tonics that give satisfactory results and foods that produce physical growth and eggs.

### CATS, DOGS

In the Dog and Cat Departments you will find a large and varied selection of collars, harnesses, chains, leads, feeding dishes, brushes, biscuits or medicines. Nothing of use for or benefit to the Dog or Cat omitted.

### BIRDS

When we say Birds, we stop, for words can not portray beauties or produce the melodies of song. We have St. Andreasberg Rollers, Hartz Mountain German Warblers, and English Canaries. We furnish prices upon application and can make safe shipments by express. We handle only the best of cages and mixed or plain bird seeds.

### FISH

Gold fish are ornamental in any home. Make your choice of the Fan-tail, Fringe-tail, Comet, Telescope or Straight-tail. We have all these, also foods, appliances, etc., that they require.

### RABBITS

Good health and proper foods are essential for successful rabbit raising. Our line, medicines, accessories and food have been selected with the utmost care.

List of good books for your instruction, also special catalogs of any of these departments furnished on application.

# Narcissus or Daffodil (See Front Cover)

The Narcissus is one of the most useful of the early blooming bulbs, being hardy and of easy culture. Large quantities should be planted for a supply of early cut flowers, and a portion should be in sunny, and a portion in shaded places, to prolong the season of flowering. The graceful flowers render them peculiarly valuable for this purpose, and if cut when partially opened, they will develop in water, and last for many days. One of the good features in growing Narcissus is that when a planting is once made no further attention is necessary, as they will protect themselves against all encroachments.

**Culture**—Narcissus thrive in a light, rich soil, and when possible they should be planted in beds by themselves. After the blooming season water should be withheld, and the bulbs allowed to ripen in the usual manner. The water required to keep other plants alive during the summer months is especially harmful to them. Plant the bulbs four or five inches deep and six to eight inches apart. After a growth of a few inches is attained, give a good liberal mulch of well rotted manure. Plant in October to February. Blooms from February to May.

## POLYANTHUS NARCISSUS

<b>Campernelle Yellow</b> .....	.25	1.50

**DO NOT FAIL TO LOOK OVER THE LIST OF SEEDS FOR FALL PLANTING IN THE LAST PAGES OF THIS CATALOG. THERE IS ALSO A CONDENSED LISTING OF PLANTS AND SHRUBS WHICH WILL INTEREST THE READER FOR TIMELINESS.**

## Ornithogalum

**Arabicum**, beautiful variety, Ea. Doz.  
throwing a tall spike of numerous star-shaped flowers with a jet black center and having a distinct aromatic perfume, decidedly pretty when grown in the garden. Large size, each \$0.10 \$1.00  
Small size, each .05 .50

## Oxalis

The flowers are handsome and graceful in form, beautiful in color and produce an abundance of flowers and dainty foliage for winter and early spring. They are suitable for hanging baskets, pots, window boxes and borders.

**Culture**—For pot culture, plant from six to eight in five or six inch pot and cover about one inch deep. For beds plant four or five inches apart and one to two inches deep in rich friable soil. Will stand an abundance of water. Plant in July. They will bloom in the winter and early spring.

**Grand Duchesse, White**, large pure Doz. 100  
white, on single stems from  
5 to 8 inches long, bright green  
foliage, extra fine . . . . . \$0.30 \$2.00

**Grand Duchesse, Pink**, bright pink  
on single stems; compact,  
sturdy grower with dark green  
foliage . . . . . .39 2.00

**Grand Duchesse, Lavender**, pink-  
ish lavender, changing to old  
rose, on single stems 5 to 8  
inches long; dark green  
foliage . . . . . .30 2.00

**Bermuda Buttercup**, flowers are  
very large, bright buttercup  
yellow, produced in great pro-  
fusion on long stems; one  
bulb of this variety is suffi-  
cient for a 5 or 6 inch pot,  
and if properly treated may  
be had in bloom within six  
or seven weeks from time of  
planting. Well grown plants  
have produced over 1000 blos-  
soms in one season, and as  
many as 70 flower stems at one  
time; two for 5 cts. . . . . .35 2.50

**Bowell** is decidedly the handsom-  
est. The flowers are large and  
of a most brilliant rose color.  
If planted in a rockery or  
border it will dispute position  
with almost any other plant.  
Bulbs ready for planting from  
July to November; two for  
5 cts. . . . . .30 2.50

**Choice mixed**, two for 5 cts. . . . . .25 1.50

## Ranunculus

The Ranunculus produces strikingly beautiful flowers of every imaginable shade from bright vermilion to pink, yellow and pure white. The plants are free bloomers, very double and useful for cut flowers. If little care is used a glorious display will follow in the spring. Plant from November to March.

**Culture**—Before planting the roots soak them in water for two or three hours; this causes them to swell to full size. Plant them in a good, rich soil, claws downward, six to eight inches apart each way and cover the roots with two inches of finely sifted soil.

Ready about November 1st.

flora, dwarf, white feathery  
flowers and handsome fern-  
like foliage, strong clumps . . . \$0.25 \$2.50  
Spirea ready for shipment about January 1.

## Tigridia

Mexican Tiger Flower. The flowers are indeed remarkable, though they are of short duration, lasting only one day. They are produced in such abundance in succession as to make their culture desirable and interesting. One plant will continue flowering for nearly three months. During this time it will be an elaborate display for your garden.

**Culture**—Bulbs ready about the middle of December. Plant about two inches deep and six inches apart. Water freely. They will bloom in July, August and September.

RANUNCULUS

# Tulip

For grand effect as early spring flowers, the Tulips probably head the list of bulbous plants. It was long considered that the growing of Tulips in California was a failure, but the past few years have proven, that accorded proper conditions, they will produce a fine display of blossoms. Experiments with Tulips under favorable conditions have produced flowers with stems fully twenty-four to twenty-eight inches long. The great cause of failure here is that the soils are too heavy. With this knowledge in view the successful cultivation of tulips lies principally in the soil preparation.

**Culture**—Select a half shady plot in the garden and if the soil is not already a very sandy loam excavate to the depth of ten inches, replacing with sandy loam, three parts to one part cow manure rotted and add even to this clean sand, fill to four or five inches above the surrounding ground, level off smoothly and plant the bulbs three or four inches apart and four inches deep. Place a ridge around the edges so that the bed may be flooded as sprinkling is more injurious than beneficial and tends to destroy the blooms when open. Plant any time from October to January.

# Tuberose

Tuberoses are very familiar, highly fragrant, stiff, waxy-white double flowers that blossom in August and September. The flowers are clustered on tall spikes that rise from a tuberous root-stalk. The odor of the Tuberose lends a subtle charm to the garden. They are admirably adapted for cut flowers, and are of easy cultivation.

**Culture**—Plant in open ground, when the soil has become warm, to the depth of three to four inches. They do best in an open sunny place. Water freely as soon as the points appear above the ground. Plant from January to May.

**Double Pearl**, far superior to the old double variety, growing only about two feet high, with large individual double white florets, which have longer foot stalks than the old variety, rendering them more useful for cut flower purposes. Large bulbs, each 5 cts; per dozen 50 cts; per 100 \$3.00.

# Watsonia

Similar to the Gladiolus, even in culture. It grows about 4 feet high and produces a wonderful profusion of flowers which are in bloom about Easter time. Ready for planting in August.

**HOLLOW-CROWNED.** Fine for table or stock. . . . . .05 .15  
**IMPROVED GUERNSEY.** Half long and large. . . . . .05 .15  
**SHORT ROUND OR TURNIP ROOTED.** For shallow soils. . . . . .05 .15

**PEAS**

**FIRST EARLY VARIETIES**

**AMERICAN WONDER.** Wrinkled sort, dwarf habit, very prolific. . . . . .10 .30  
**GRADUS.** Wrinkled sort, large pods, very sweet peas. . . . . .10 .30  
**McLEANS LITTLE GEM.** Peas excellent flavor, very large pods for so early  
 a pea. . . . . .10 .35  
**NOTT'S EXCELSIOR.** Hardy and quick grower, peas tender and fine flavor  
**PREMIUM GEM.** A fine early, wrinkled pea, dwarf. . . . . .10 .35

**SECOND EARLY VARIETIES**

**CHAMPION OF ENGLAND.** Very hardy, prolific, fine quality. . . . . .10 .35  
**DWARF SUGAR OR EDIBLE POD.** Can be cooked and used same as  
 stringless beans, very sweet. . . . . .10 .35  
**STRATEGEM.** Heavy cropper, producing well-filled pods, very sweet. . . . . .05 .30  
*Germain* **YORKSHIRE HERO PEAS.** Has great power of adaptability; Peas  
 are excellent flavor. . . . . .10 .30

**LATE VARIETIES**

**TELEPHONE.** A fine wrinkled pea growing about four feet high, very  
 prolific, very large pods, fine quality. . . . . .10 .40

**RADISHES**

*Germain* **GERMAIN'S EPICURE RADISH.** Solely a relish, color scarlet  
 with white tip. Very quick growing, maturing in eighteen days.  
 Firm, mild in flavor, never pithy. . . . . .10 .15  
**BLACK SPANISH WINTER, LONG.** Oblong shape, quite solid. . . . . .05 .10  
**BLACK SPANISH WINTER, ROUND.** Round in form. . . . . .05 .10  
**CALIFORNIA MAMMOTH WHITE.** Winter sort, very large, flesh white,  
 firm and excellent flavor. . . . . .05 .10  
**CHARTIER.** Long and smooth, red with white tip. . . . . .05 .10  
**CHINA ROSE WINTER.** Medium size, oblong, rose color. . . . . .05 .10  
**CRIMSON GIANT TURNIP.** Extra large turnip-shape variety. . . . . .05 .10  
**EXTRA LONG SCARLET SHORT TOP.** Long, bright scarlet radish,  
 very brittle and sweet. . . . . .05 .10  
**EARLY SCARLET GLOBE.** Very solid, bright red color. . . . . .05 .10  
**FRENCH BREAKFAST.** Early variety, scarlet, tipped with white. . . . . .05 .10  
**JAPANESE SUMMER RADISH.** Mammoth variety, very tender. . . . . .05 .10  
**JAPANESE WINTER RADISH.** Greatly resembling Japanese summer  
 radish, but smaller. . . . . .05 .10  
**LONG WHITE ICICLE.** Long radish, very tender and crisp. . . . . .05 .10  
**MODEL WHITE BOX.** Early white, round radish. . . . . .05 .10  
**SCARLET TURNIP.** Popular little red radish, quick grower. . . . . .05 .10  
**SCARLET OLIVE-SHAPED.** Oval shape, early, tender and brittle. . . . . .05 .10  
**SCARLET TURNIP, WHITE-TIPPED.** Of excellent quality. . . . . .05 .10

**SORREL**

**LARGE-LEAVED FRENCH.** Used for salads and like spinach. . . . . .05 .25

**SPINACH**

**BLOOMSDALE, OR SAVOY-LEAVED SPINACH.** Thick, dark green leaves,  
 early and best for fall use. . . . . .05 .10  
**LONG STANDING.** Leaves large, thick and crumpled, slow to go to seed. . . . . .05 .10  
**NEW ZEALAND.** Abundant producer, best for the spring. . . . . .05 .15  
**PRICKLEY OR FALL.** Splendid fall or winter sort, quick grower. . . . . .05 .10  
**ROUND OR SUMMER.** Does best sown in early spring. . . . . .05 .10

**TURNIPS**

*Germain* **EARLY PURPLE TOP MILAN.** This variety is very delicious  
 and early. It is medium size, flat and thick, with a smooth, bright  
 purple top, snow white flesh. . . . . .10 .15  
**COW HORN.** Pure white, shaped like a carrot. . . . . .05 .10  
**EARLY WHITE EGG.** Egg shape, flesh firm, mild and sweet. . . . . .05 .10  
**EARLY WHITE FLAT DUTCH.** White flesh, medium size. . . . . .05 .10  
**RED TOP WHITE GLOBE.** Large and rapid grower, flesh pure white, very  
 sweet. . . . . .05 .10  
**GOLDEN BALL.** Round, smooth skin, bright yellow. . . . . .05 .10  
**PURPLE TOP STRAP-LEAF.** Matures quickly, excellent flavor. . . . . .05 .10  
**EARLY SNOWBALL.** Grows even in size, pure white and round in shape,  
 very sweet. . . . . .10 .15  
**WHITE GLOBE.** A large turnip, but matures quickly. . . . . .05 .10

## NURSERY DEPARTMENT

The success of our Nursery Department during the past year has been so great, in spite of the general depression in business, that we have again added considerably to our land holdings and have erected, at considerable expense, new lath houses and greenhouses to take care of the rapidly increasing trade along this line. Not only are we leading in the landscape work in Southern California, having secured a great majority of the larger contracts offered for public competition, but we have added greatly to the variety of stock grown. Frequently our customers have congratulated us upon the great variety in our stock. They know they can find something different to what may be seen in the ordinary nursery, something that is not seen in every place where plants are grown. This is distinctly encouraging to us for it shows that our many years of earnest endeavor has not been in vain. We may truthfully be said to have "scoured the earth" for novelties and unusual plants, but the plants we offer have to pass a rigid test in our own trial nurseries and have to prove up to our high order of merit before we offer them to our customers. While the list below is not a tithe of what we have to offer, we are convinced there is not an item there but will give satisfaction, nothing that we have not fully tested and can recommend for Southern California. To those of our Eastern patrons and others who have not the generous sun and the magnificent climate we boast of here we may say: "Write us respecting the suitability or otherwise of our plants for your section of the country. If they are suitable we will tell you so; if not, we will advise you against them". For the secret of our success is and always will be making other people successful with our plants.

## LANDSCAPE GARDENING

We cannot show here the beautiful effects that can be obtained by correct treatment and the planting of suitable subjects in the landscape. It does not matter whether there is a city lot to be planted or a hundred acre pleasure. Whether we work to suit a California bungalow or a colonial mansion, our landscape men are artists in the true sense of the word. They can draw pictures on paper if you need them but they are better at putting the picture where you want it, on your place. Kindly write us and we will go anywhere to advise on the proper treatment of your grounds. We plant new places or we renovate existing ones and our work has been uniformly satisfactory in either case.

### Araucaria

**Bidwilli.** One of the finest trees for a mild climate and the easiest of all to grow. We have immense specimens in stock also small plants suitable for porch decoration to be planted out afterwards. Price 75 cts. to \$5.00.

**Excelsa Plumosa** (Norfolk Island Pine). Best of all the Excelsa types with beautiful deep green plumose branches. We have excluded all others from our list as we find this the most satisfactory; our stock is in perfect condition. Price \$1.25 to \$2.00.

**Imbricata** (Monkey Puzzle). Does not thrive as well as the other species here, but it is a distinct tree where it does well. The popular name comes from the spiny branches which would make it difficult for even a monkey to climb. Small plants 75 cts. to \$1.25.

### Azalea

In spite of the disturbed European conditions we have every reason to think our stock of Azaleas will again come to hand. If there are no new importations this year there may be a slight advance in price but we have already on hand a fine stock in almost all varieties. The illustration herewith is taken from one of our ordinary plants not selected in any way. Prices \$1.00 to \$2.00 according to size. Kindly order early while the lines are complete.

#### EARLY FLOWERING VARIETIES

**Deutsche Perle.** Pure snow white. The plants do not always arrive in good condition, but it is one of the best of all when they do.

**John Llewellyn.** Light pink, large flowering.

**De Schryveriana.** Two different shades of pink; very showy.

KENTIA FORSTERIANA

**Simon Mardner.** Rosy red, one of the most popular for Christmas decoration.

**Mme. Petrick.** Brighter red than S. Mardner and a splendid forcing kind.

**Vervaeana.** White ground, heavily overlaid and striped with pink. A magnificent variety.

**Vervaeana Alba.** A pure white variety of the last named, similar to it in every other way.

#### LATE FLOWERING VARIETIES

**Imperatrice des Indes.** A large pale pink form, very popular for Easter.

**Mme. Van der Cruyssen.** A very fine kind. It can be forced early and also be held over until its natural flowering time, which is late. The color is rosy pink and is of superior habit.

**Niobe.** The best late white variety.

**Professor Wolters.** Deep pink; one of the finest.

**A. Mollis.** Hardy, deciduous, free flowering plant with very showy blooms.

**A. Japonica.** The Japanese Azalea is smaller flowering than the Indian, but it thrives better in California, owing to climatic conditions being more suitable. Fine for Japanese gardens or for clothing bare hillsides with beautiful foliage and fine, showy flowers. We recommend it strongly. Price 75 cts. to \$5.00.

#### MICELANEOUS PLANTS

**Boston Ferns.** The Boston Fern is the best known of the Nephrolepis family, but we have several other kinds, including N. Whitmani, the beautiful Ostrich Plume Fern and N. Piersoni, the most attractive and best known of all the Boston Fern family. Prices from 25 cts. to \$2.00, according to size. Baskets and wall-pockets filled with these to suit customer's taste from 75 cts. up.

**Cannas.** See special list page 5.

**Escallonia.** Where they thrive the Escallonias are among our finest shrubs. We have both red and white forms; 15 cts. to \$2.00.

**Eugenia Myrtifolia.** A gem in every way and the finest of all the Myrtle family. It is beautiful in the smallest stages, but with age it becomes superb, the lovely tints of the young foliage captivating everyone; 35 cts. to \$1.00. Large specimens, prices quoted on application.

**Grevillea Robusta.** A pretty plant in a small state for fern dishes and table work. When too large for this they can be planted out on the lawn or in the shrubbery, making a most attractive tree. Nice little pot plants 5 and 10 cts. each. Larger 25 and 50 cts.

**Hydrangeas.** Noble plants in the garden producing immense heads of rosy pink flowers in great profusion; 25 cts. to \$1.00 each.

**Pansies.** Our pansy fields are always a delight in spring to the thousands of automobilists and others passing our Whittier road establishment. We grow hundreds of thousands in all the best varieties and sell them in either separate colors or mixed; 25 cts. per dozen, \$2.00 per 100.

**Roses.** We have not space here for a long list of roses, but we carry all the finest varieties in stock. They can be lifted from our Nursery and balled or we can supply most varieties in pots. The plants are clean and in a good healthy growing condition. The price varies considerably owing to size of plants and varieties, but we sell all the popular kinds at 25 cts. and 50 cts. each, \$2.50 to \$5.00 per doz. Climbers 35 cts. to \$1.00 each, \$3.50 to \$10.00 per dozen.

**Stocks.** The value of winter flowering stocks is well known. Easily grown, fragrant and beautiful, it is no wonder they are popular. The best colors are rose, pink, lavender, crimson, and white. Nice plants, any colors or mixed; 25 cts. per doz., \$2.00 per 100.

**Kentias.** The beautiful Kentia Forsteriana is undoubtedly the most popular indoor palm and rightly so, for it is at once the most graceful and the hardiest of all palms used for the purpose. Our stock is always maintained at a high standard of excellence, and we can say without boasting that there are no healthier plants in the country. We have them from the seedling state up, the prices ranging from 25 cts. to \$25.00.

#### NEW AND RARE SHRUBS

We have not room here to go fully into the culture of rare and showy shrubs suitable for landscape planting. Our list is a long one and we invite those interested either to write us or to call at our nursery salesyard and make arrangements for an auto ride out to our nurseries. Courteous salesmen will show and explain to you these novelties and you will not be asked to buy unless you wish. Kindly ask to be shown the new types of Deutzia, Berberis, Ceanothus, Hypericum, Leptospermum, Veronica and Weigela in particular.

#### VINES

A large selection of the finest kinds, such as Jasmine, Trumpet creepers, Tecoma, Ampelopsis, Ivies, Wire vines, Passion Vines and others, 25 to 50 cents each. Larger sizes on application.

#### VEGETABLE PLANTS

We always carry large numbers of the most popular vegetable plants, such as Cabbage, Cauliflower, Tomato, Pepper and others. These are grown in our nursery from Germain's tested seeds and there is no question about their being the best.

AZALEA

# A Few Flower Seeds for Fall Sowing

**Alyssum**, Sweet, white, ht. ¾ ft. . . . . Pkt. **\$0.05**  
 Alyssum Compact dwarf; ht. 1-3 ft. . . . . **.05**

## A FLOWER SHOW IN YOUR GARDEN

### GROW THE 12 EXHIBITION VARIETIES OF New Spencer Sweet Peas

**PRICE:**

15c. per pkt.                      60c. per oz.  
Whole collection of 12 pkts., \$1.25

**Agricola—Blush Pink.** The largest and loveliest Spencer; long stems and an exquisite rosy-blush.

**Constance Hinton—Pure White.** Extra large-frilled and one of the latest novelties.

**Dobbies Cream.** This is undoubtedly the best cream Spencer grown; beautifully waved large flowers.

**Hercules—Rose Pink.** Immense flowers, long stems and a beautiful rich clear rose-color, very vigorous and a free bloomer.

**Illuminator.** A glowing cerise-salmon with an indication of bright orange, which glistens in the sunlight. Flowers large and wavy. This is the most beautiful of the many new Spencers.

**King White.** The best Spencer White ever produced.

**Leslie Imber.** Deep pinkish lavender flowers of large size, much waved and long stems.

**Margaret Atlee.** A rich glowing pink softly suffused with salmon. Flowers extraordinary size, exquisitely waved and freely produced on long stems.

**Nubian.** A new deep maroon, self-colored and of great merit. Giant flowers beautifully waved.

**Rosabelle.** Undoubtedly the largest deep rose yet produced. Flowers much waved and crimped.

**Scarlet Emperor.** A vermilion brilliant, beautifully waved, surpassing all other scarlets in color and size.

**Zephyr.** Deep clear lavender. Extra fine.

## Hints on the Formation of Lawns

See that the ground is well prepared. Dig or plow ground to the depth of eight inches. Afterwards harrow or rake carefully, pulverize all lumps, and remove all large stones. If the soil is shallow, procure a supply of fine mold and spread over the surface to a depth of five inches. Soil may be enriched by bone meal or well-rotted manure wherever necessary; then rake level and roll the soil well to make a solid bottom. Scatter the seed evenly over the surface at the rate of 150 pounds to the acre (for Blue Grass), one pound to sixteen feet square. Rake seed in and roll, water regularly and carefully, as the soil is liable to dry out in the heat of the day, and if it does while the seed is germinating it will invariably perish. When the grass is three inches high it should be cut and rolled, and every week or so thereafter until the grass has become firm. Eradicate weeds whenever they appear, without disturbing the grass. Should bare spots appear, rake the surface and sow more seed. The roller should be used frequently during the season, and a dressing of lawn fertilizer once a year is necessary to the maintenance of a good lawn.

CENTRAL PARK, LOS ANGELES  
This lawn planted with Germain's Extra Recleaned Grass Seed

### LAWN GRASS SEED

**Kentucky Blue Grass.** The seed we offer is extra fancy recleaned seed, the finest and purest grade obtainable anywhere. Per pound 30 cents.

**White Clover.** Our seed is strictly first-class, absolutely clean and pure and of the highest quality. Per pound 60 cents.

Los Angeles, Cal., September 1, 1915.

GERMAIN SEED & PLANT CO.,

Los Angeles, Cal.

Gentlemen:

The lawn grass seed which you sold me has proved so entirely satisfactory and has made such a fine lawn, that I want to tell you about it.

It has only been a short time since our place was practically barren, and it being a fact that we started with such grounds, we consider the splendid growth we obtained very remarkable. Our lawns came up evenly and made such a steady growth, that they are now one continuous stretch of green, making a very pretty turf.

Of course we were careful to prevent any weeds being left in the soil. Furthermore, we used a good fertilizer which we consider a very material aid.

As a conclusion, I might say that our lawns are a splendid stand of Kentucky Blue Grass and White Clover.

Very truly yours,

A. YORNGEMAN

Head Gardner-Selig Polyscope Co.

### FERTILIZERS

Fertilizers are an important but little understood item connected with flower and bulb culture. One can readily understand that animals must have food, but that plants must feed also is something not quite so plain. We can compare the soil to a storehouse containing so much food, which is being constantly used up by the plants, year after year. It is clearly evident that the continual taking up of this food by the plant will deplete the soil. The elements which are in the soil in small amounts and which are absolutely essential to plant life, are Nitrogen, Phosphorus and Potash. These are known as the "critical elements," because they are so often present in small quantities, and also because the plants must have them.

As is well known, a poor, barren soil gives weak, immature flowers—while a rich, fertile soil furnishes us with the luxuriant growth of flowers which we so highly prize. Have you ever passed a place with a bed of flowers in it that were weak, anemic appearing blossoms, while a short distance further you noticed the sturdy, richly colored bed? Care, cultivation, watering, position, soil, and fertilizing, enter into the difference and not the least of these is fertilizer.

For List of Fertilizers see next page

# FERTILIZERS

The Germain Seed & Plant Co. have endeavored for years to obtain a fertilizer which would meet all the requirements necessary for flower culture. We owe it to our large patronage to recommend only that which will give results and satisfaction. To that end we have finally perfected a fertilizer which we think will satisfy all requirements. It is of a concentrated nature, requiring but very small doses to the plant and will undoubtedly yield good results. This material is known as the **NUVIDA FLOWER AND FERN FERTILIZER** and we confidently feel assured of its success, because of its purity, its food value, and its proportions of fertilizer elements. Nuvida Flower and Fern Fertilizer, 25 cents per can.

**NUVIDA FERTILIZERS.** Germain's Lawn and Garden Special. We recommend this especially for lawns, flowers, and the small garden. We feel certain that there is no other product on the market which will give as good results when used for the same purposes, as this **NUVIDA FERTILIZER**. It is sown like grain and after sprinkling, the material is removed from sight. In a very short time probably less than a week, you will see the good results in the rich, green coloring of your lawn, or the luxuriant growth of your flowers and plants. Use at the rate of 10 pounds to 300 square feet.

10 pounds.....	\$0.50	25 pounds....	\$1.00
50 pounds.....	1.60	100 pounds....	3.00

**Pure Dried Blood.** Confidently recommended where a high nitrogenous fertilizer is required; 100 pounds \$4.00.

**Pure Steamed Bone Meal.** Finely ground and of first quality; decomposes rapidly in the soil; 5 pound bag 25 cents, 50 pound \$1.35, 100 pound \$2.50, 500 pound \$11.25.

**Germain's Lime Carbonate.** A very finely ground carbonate of lime which is 96 per cent pure. It is unexcelled for neutralizing acidity and your sour lawn or garden will show wonderful improvement by using it; 100 pounds \$1.50. Much lower rate by the ton.

**Leaf Mold.** Fine for mixing in soil for potting house plants, ferns, etc." Per sack 75 cents.

**Pulverized Sheep Manure.** This is not the weather bleached or adulterated kind that is often found, but is specially prepared and carefully handled so that it possesses all of the elements of a high class fertilizer, free from weed seeds, and strong in plant food. Per pound 5 cents, 25 pounds 60 cents, 50 pounds \$1.00, 100 pounds \$1.75.

# INSECT PESTS AND PLANT DISEASES

To the grower of flowers, insects are very troublesome at times. The aphides, principally the green and also the black aphid cause most of the trouble, while worms eating off the young shoots of the plants, and worms in the ground are also common pests. We wish here to make plain to the lover of the garden that insects are different structurally and require different treatment. We find one great class, the leaf-eaters, comprising the beetles, caterpillars, worms of all sorts, etc. When one goes out into the garden and finds the leaves eaten up, remember that the only practical remedy is a poison spray which coats the leaves and the insect eating it is poisoned. The only safe and sure spray is Corona Arsenate of Lead Powder.

For the little green lice and black lice on flowers a contact spray must be used, something that clogs up the breathing pores. Lice suck their food and therefore a poison spray is not effective. We recommend **FLORAL NICOTINE** as being the most effective spray to be used.

For Scale a spray which has both dissolving and penetrating properties is essential. The scale insects have a hard, greasy covering and this must be dissolved in order to make the spray effective. So here we recommend the **RESIN WASH SPRAY** as being one that will give the most satisfactory results.

However, insects are not the only troubles met with. Plant diseases, which are caused by one form of plant life growing on the other, are common, and these require different treatment.

FOR ALL LEAF-EATING INSECTS use **CORONA DRY ARSENATE OF LEAD**—in 25 and 40 cent sizes.

FOR ALL APHIDES, THRIPS, ETC., use **FLORAL NICOTINE**—in 25, 50 and \$1.00 sizes.

FOR SCALE INSECTS, we unhesitatingly recommend **RESIN WASH**, sold at 25, 50 and \$2.00.

FOR MILDEW use **ATOMIC SULPHUR, FLOWERS OF SULPHUR, FUNGINE, or GRAPE DUST.**

Atomic Sulphur.....	\$0.35 per pound
Flowers of Sulphur.....	.05 per pound
Fungine.....	.75 per quart
Corona Dusting Sulphur.....	.20 per package

FOR RED SPIDER use **LIME AND SULPHUR** in winter and **ATOMIC SULPHUR** in summer. Lime and Sulphur is sold in 25, 50 cent and \$1.00 and \$3.00 containers.

FOR BLIGHT, RUST and other diseases **BORDEAUX MIXTURE** is absolutely the "best material to use. Sold in 35 cent and \$1.50 sizes.

## SPRAY PUMPS

For the small place, with a few rose bushes, and plants, we recommend the New Misty or the Daisy Sprayer. For the fair-sized home, there is nothing better than the Aerospra, or Perfection Sprayers. They are simple, efficient, and satisfactory.

### THE DEMING "AEROSPRA"

A compressed air sprayer of improved design with several new and valuable devices, with new features of portability and a detachable cylinder and filling device, making it the "best yet" of its kind. The operator can pump and spray at rest, until the reduced pressure requires pumping again. Price \$9.00.

### "PERFECTION" SPRAYER

The tanks are made of heavier metal than has ever been used in sprayers of this kind, are lock seamed at the corners to convex heads of metal two gauges heavier than the sides, a single seam runs lengthwise of the tank. This seam is reinforced by rivets, making the tank practically unbreakable.

The hose is attached to the sprayer at an angle so that it will not kink and become cracked and broken. The shoulder strap is attached with snaps and can be quickly and easily removed.

This sprayer will handle whitewash, water paints, Bordeaux mixtures, etc., perfectly.

For whitewash and all heavy mixtures it is necessary to use a "W. W." cap in nozzle, which is furnished with sprayers.

These sprayers are made in galvanized steel or brass. Weight, 9 pounds empty. All sprayers tested to 60 pounds before leaving factory.

Galvanized, steel.....	\$5.00
All brass.....	7.50

The "Brandt Easy" Sprayer is made with galvanized iron tank, and is designed for those who want a small sprayer. It works on the same principle as our regular sprayers and is equipped with shut-off nozzle and funnel. Capacity 1 gallon. Weight 3 pounds. Price \$2.00.
